

Allerton C of E Primary School – Core Principles of Science

Science is
children
questioning.

Science is
children
discovering for
themselves.

Science is
children
making wider
connections to
the outside
world, helping
them achieve
their future
ambitions.

Science is
children taking
their learning
home.

Science is
children
enjoying
learning new
skills.

Our Vision:

At Allerton C of E Primary School we encourage a love of science by using the pupils' natural curiosity to ask questions, investigate and make connections to the outside world including their future place in it.
